- Various testing frameworks for Javascript including Jest, Cucumber, Mocha, and Jasmine

- Advanced knowledge of C and C++, Assembly/Disassembly

PAST PROJECTS

Twitch ads marketplace(Laravel / Vue js)

- First of all whole application is built as SPA. That means that you don't have to wait for a whole page reload and be annoyed by screen blinks during reload. When you click internal link only part of page is reloaded. That was achieved by using Vue.js, Vue Router and AJAX requests. One of the interesting things implemented is real-time chat built using Socket.io engine
- https://instreamed.com

Web dashboard to manage Utils(react / redux) (11/2018 - 01/2019)

- Web dashboard to manage Utils.
- We have 3 members in the development team. My role is frontend developer.
- https://www.crowdy.ai/

Deal Sheet Board (03/2017 - 10/2017)

- Manage all deals of clients. Create, modify, delete, drag-drop each deal.
- Sharing deal sheet for people who have been invited.
- Newsfeeds with infinity scroll.
- https://dealsheetboard.com/

Follow Training

- https://play.google.com/store/apps/details?id=com.mwy.followapp
- Follow is the perfect app to keep your training colleagues close, get exclusive access to groups and take in more knowledge on topics from training you completed
